

The section headings reflect the organizational layout of the SIL PUA block for Ethiopic. Fidel assignments reflect the original understanding of the role of a particular fidel. As information on a particular fidel changes, it may not “fit” in that particular block. However, for backward compatibility purposes, no reencoding of fidels will take place. Gray means variants.

U+E000 – U+E37F: characters with some potential for future addition to Unicode

E021	ሙ	ETHIOPIC SYLLABLE MWE • Leslau’s Sebatbeit variant of U+1383 ሙ
