Introduction

Tifinagh is encoded in the U+2D30..U+2D7F block of Unicode.

This document aims to give guidance on the encoding of text using the Tifinagh script. Since the script is used for a number of orthographies covering different languages, the development of this document is ongoing. It aims to bring together the results of consensus between experts in the encoding of the various orthographies using the script. In terms of the Unicode standard, this document is purely informative since it is concerned with issues not covered by that standard.

This document also aims to give guidance on font development for the different orthographies and languages.

To Add

- Perhaps include transliteration. where known.
- Perhaps sort orders, where known.

The Unicode Model

Basic Consonants

The basic consonants are relatively obvious and can be discovered by viewing the Unicode charts.

Design: There can be some design issues related to "dotted" characters especially when the design is similar. When these characters appear together, they can be difficult to read unless care is taken to change the size or spacing of the dots: ••••••••. The Neotifinagh design does not have as significant an issue: o••••••o

Vowels

Vowels are not as clearly defined. Neo-Tifinagh does not have any special vowels. However, different traditional Tifinagh orthographies may demonstrate vowels using combining marks in different ways. These vowels are primarily used as an aid in learning to read.

SIL

Vowels						
Tfng	◌̣	◌̤	◌̥	◌̦	◌̧	◌̨
USV	2D30 + 0302	2D30 + 0306	2D62 + 0323	2D62 + 0302	2D53 + 0302	2D67 + 0302

APT

Vowels						
Tfng	◌̩	◌̪	◌̫	◌̬	◌̭	◌̮
USV	2D30	2D66	2D62	2D67	2D66 0302	2D67 0302

Hawad

Positioning of U+0308 is incorrect in most fonts

Vowels					
Tfng	◌̥	◌̦	◌̧	◌̨	◌̩
USV	2D5D 0307	2D5D 0308	2D5D	2D49 0307	2D49 0308

Punctuation

Western-style punctuation signs are used in Tifinagh. Words are separated by a space.

A few languages use a special separator mark which has been encoded in the Tifinagh block. The languages using the separator mark will be indicated in the section on that language. Otherwise, punctuation will not be listed in each section.

Punctuation								
Tfng	.	,	;	:	?	!	...	↵
USV	002E	002C	003B	003A	003F	0021	2026	2D70

Digits

There does not seem to be any common way to write numbers using Tifinagh script. The Ircam Tifinagh uses the usual Western-style digits

Variant Glyphs

This chart includes a sampling of some of the possible glyph variants in current use. It does not demonstrate all of the possible historical glyph variants.

Because these glyphs are taken from various fonts, the height of a particular glyph may not be significant.

	2D3	2D4	2D5	2D6	2D7
0	ⵝⵞⵟⵠ	ⵡⵢ	ⵣⵤⵥ	ⵧ	↵
1	ⵉⵊ	ⵋ	ⵌ	ⵍ	
2	ⵎ	ⵏ	ⵐ	ⵑⵒⵓ	
3	ⵔⵕ	ⵖ	ⵗⵘⵙ	ⵙⵔⵕ	
4	ⵖⵗⵘ	ⵙⵔⵕ	ⵙ	ⵙ	
5	ⵙⵔⵕ	ⵙ	ⵙⵔⵕ	ⵙⵔⵕ	
6	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
7	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
8	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
9	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
A	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
B	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
C	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
D	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
E	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	
F	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ	ⵙⵔⵕ

Variants will only be included in each language section when there are known variants.

Bi- Tri-Consonants

Bi-consonants are additional letterforms used in the Tifinagh script, particularly for Tuareg, to represent a consonant cluster—a sequence of two consonants without an intervening vowel. These bi-consonants, sometimes also referred to as bigraphs, are not directly encoded as single characters in the Unicode Standard. Instead, they are represented as a sequence of the two consonant letters, separated either by U+200D ZERO WIDTH JOINER or by U+2D7F TIFINAGH CONSONANT JOINER.

When a bi-consonant is considered obligatory in text, it is represented by the two consonant letters, with U+2D7F TIFINAGH CONSONANT JOINER. inserted between them. This use of U+2D7F is comparable in function to the use of U+0652 ARABIC SUKUN to indicate the absence of a vowel after a consonant, when Tuareg is written in the Arabic script. However, instead of appearing as a visible mark in the text, U+2D7F TIFINAGH CONSONANT JOINER indicates the presence of a bi-consonant, which should then be rendered with a preformed glyph for the sequence.

Some of the bi-consonants have ascenders. These should ascend above the normal height of the Tifinagh consonants.

Resources

Keyboarding

The only standard keyboard known at the moment is the [Moroccan standard keyboard](#). A keyboard based on the Moroccan standard keyboard is supported in Microsoft Windows.

Keyman is a cross-platform keyboarding application. Four keyboards are available for the Tifinagh script:

- [Tifinagh \(Basic\) Basic](#) [tzm]
- [Tifinagh \(Full\) Basic](#) [tzm, thz, tda, thv, kab, mzb, shi, shy, rif, tmh, zen, zgh]
- [Tawallammat Tifinagh \(SIL\)](#) [ttq, tzm]
- [Tuareg Tifinagh](#) [taq, thv]

Fonts

These fonts provide support for some or all of the Tifinagh block.

- [Noto Sans Tifinagh](#)
- [Akatab](#) - currently only covers part of the Tifinagh block for Tamahaq, Tamashek, and Tawallammat languages
- [Tagmukay](#) - only covers part of the Tifinagh block for the Tawallammat Tamajaq language
- [Catrinity](#)
- [IRCAM Tifinagh fonts](#) - supports Neo-Tifinagh
- [Hapax font set](#)
- [MPH 2B Damase](#)
- [DejaVu](#)

Known glyph variants

The Tifinagh script was encoded based on Neo-Tifinagh shapes. It seems unlikely that there would be glyph variants.

Bi-consonants

Bi-consonants are not “required” in Neo-Tifinagh. If a font supports bi-consonants, the two consonants separated by the ZWJ should thus form a bi-consonant. If a font does not support bi-consonants, they should simply appear as separate consonants.

Contextual Shaping

Neo-Tifinagh does not use contextual shaping for the “l” and “n”. This is because the glyphs are distinguishable from each other when side by side.

Sorting

ⵝ < ⵞ < ⵟ < ⵠ < ⵡ < ⵢ < ⵣ < ⵤ < ⵥ < ⵦ < ⵧ < ⵨ < ⵩ < ⵪ < ⵫ < ⵬ < ⵭ < ⵮ < ⵯ < ⵰ < ⵱ < ⵲ < ⵳ < ⵴ < ⵵ < ⵶ < ⵷ < ⵸

Language Tags: kab-Tfng, mzb-Tfng, shi-Tfng, shy-Tfng, thv-Tfng

This set of characters is used in a Algerian school text book entitled “Adlis” printed in 1988 (pp 12,13). It is unknown how widely used this book (or the characters) are actually used.

The glyphs or codepoints for y, h, and i may be incorrect.
